

GARDEN WATERING FLOW RATE GUIDE

The SJ35-04 pump models can supply a variety of garden watering applications, such as :-

- A garden hose with a spray nozzle fitted
or
- A garden spray system with up to 25 microjet sprays
or
- A garden dripper system with up to 200 garden drippers (4 litre per hour drippers)
or
- Two small impact sprinklers

With the correct selection of pipework, valves and automatic irrigation controller, the SJ35-04 models can even be used to power a fully automated watering system.

Your garden watering professional can give you the best advice on how to utilise the valuable rainwater you have captured for the most efficient usage in your garden.

GARDEN WATERING SYSTEMS

With the increased awareness by metropolitan customers of water saving, especially those installing rainwater tanks for garden and non-potable water applications, a need for a reliable way of using the water they capture has grown. Davey, with their years of experience and market leadership, have developed the Silver Series® of pumps to economically satisfy these needs.

Davey are known worldwide for the quality and reliability of their pumps, and the new Silver Series® has been developed to live up to this enviable reputation.

While the domestic backyard may not be as harsh as the Australian outback, Davey know that reliability is just as important to you. Silver Series® pumps are manufactured to the exacting standards Davey have established for all their products. Important components like bearings, capacitors, seals, controls and tanks have all been specified to Davey's standards. The Silver Series® pump will provide a dependable, value for money investment.

Davey Water Products' new range of SILVER SERIES® pumps are the ideal solution for backyard rainwater tanks and garden watering.

- ECONOMICAL
- BACKED BY DAVEY WATER PRODUCTS
- SIMPLE TO USE & INSTALL
- CHOICE OF MANUAL OR AUTO SYSTEMS
- LOSS OF PRIME PROTECTION (ON AUTO MODELS)

SJ35-04

This is a manual pump, suitable for connection to a standard power outlet and switched on and off as required. No closed head or loss of prime protection is included with this model.

SJ35-04P2C/LOP

This is an automatic model, suitable for connection permanently to a power supply and will start and stop according to pressure demand. The unit comes complete with a 2 litre pressure tank and unique Davey designed LOP pressure switch. This model has partial closed head protection as well as low pressure cut-out to provide loss of prime (no water supply) protection.

SJ35-04PC

This is an automatic model, suitable for connection permanently to a power supply and will start according to demand and stop according to flow demands. This model has anti-cycling controls; it is less likely to stop and start under low flow conditions. This model has both closed head protection (it will stop on low or no flow) as well as loss of prime protection.
