

# Features & Benefits

## A WATER CONSERVATION TOOL

- Multi-trajectory rotating streams provide unmatched uniformity
- Automatic matched precipitation even after arc & radius adjustment
- Low application rate reduces runoff on slopes & tight soils

## PROVEN DURABILITY & RELIABILITY

- Rotator® Technology proven in demanding agricultural conditions since 1987
- One moving part
- Patented "double-pop" flushes on start-up and shut-down without increasing spray head flow-by

## SIMPLE ADJUSTMENTS

- Easy arc adjustment
- Easy radius adjustment - up to 25%
- No need to change nozzle to maintain matched precipitation
- Removable inlet filter for easy cleaning

## SIMPLIFY DESIGN & INSTALLATION

- MP1000, MP2000 and MP3000 can be combined on the same zone
