Pentair Water
Pool and Spa®

The IntelliFlo is a radically different and superior pool pump.

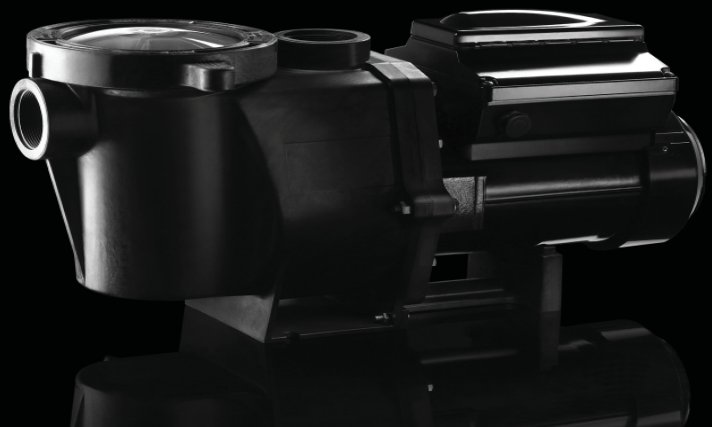

IntelliFlo® VF High Performance Pump is the first pump to deliver the exact amount of water needed to perform different tasks. It is adaptable to any pool, spa or water feature application. With its onboard computer, your pool professional simply programs the rate of flow to suit the application. It can be programmed to manage multiple functions. And, it automatically sets itself and adjusts as needed since it is constantly monitoring water flow and electrical current.

An Eco Select™ Choice: Standard pool pumps can consume as much energy as all other home appliances combined — often costing more than \$1,000 per year!

IntelliFlo® VF High Performance Pump pumps can typically cut energy use by 30% to 90%, generally saving \$324 to \$1,356 in utility costs annually — more where rates are higher than average.*

*Savings based on comparison pump running between 3.6 and 12 hours per day at the national average of 15¢/kilowatt hour in a 20,000 litre pool.
